ISOPROPYL ALCOHOL 4L

Isopropyl alcohol (IUPAC name **propan-2-ol**; also called **isopropyl**, **isopropanol**, or **2-propanol**) is a **colorless**, **flammable chemical compound** (chemical formula $\text{CH}_3\text{CHOHCH}_3$) with a strong **odor**.^[8] As an **isopropyl** group linked to a **hydroxyl** group, it is the simplest example of a **secondary alcohol**, where the **alcohol** carbon atom is attached to two other carbon atoms. It is a **structural isomer** of **1-propanol** and **ethyl methyl ether**.

3D GLUE , 55ML

The glue is perfect for FDM printing on a heated platform with all types of plastics.

How to use: before printing, apply glue to the table surface of the heated platform. To easily remove the product from the table, after printing, wait for the work surface to cool down to 30°C.

Stationery glue in a bottle with rolling applicator. Transparent. Has a high level of adhesiveness. The applicator guarantees smooth and economical application. Comes off easily with water. Non-toxic. Does not contain solvents. Frost-resistant.

The adhesive is perfectly suitable for FDM printing on a heated platform for most types of plastics.

How to use: before printing, apply the glue to the surface of the table of the heated platform.

For easy removal of the product from the table, after printing, wait for the working surface to cool to 30°C.

Weight 0.1 kg
